Objective

Pursuing an engineering career through advanced studies in control systems and cloud computing. Aiming to contribute to research in intelligent systems and ultimately become a university professor inspiring future engineers.

Education

Gunma University, B.Eng. in Intelligent Control Program *Apr 2024 – Mar 2026*

- Conducting research in Kamal Laboratory on cloud-integrated intelligent control for autonomous vehicles.
- **Research Topic:** Cloud-enabled Model Predictive Control (MPC) for vehicle platooning using AWS and CARLA.
- **Scholarship:** Takayama International Education Foundation (Fully Funded).

Nihon Computer Technical College, Diploma in Information Processing *Apr 2022 – Mar 2024*

- Studied under MEXT Scholarship.
- Practical training in web and network systems, computer architecture, and databases.

Osaka Japanese Language Education Center, Japanese Language Program *Apr 2021 – Mar 2022*

- Completed one-year intensive Japanese language course under MEXT Scholarship.

Research & Publications

Gunma University – Kamal Laboratory

Research on cloud-integrated communication framework for autonomous vehicles.

Keywords: Cloud Computing, Model Predictive Control, Cooperative Driving, AWS IoT Core, CARLA Simulator.

- *Cloud-Enabled Model Predictive Control for Optimized Vehicle Platooning in Urban Transportation*. Proceedings of the International Conference on Industrial Engineering and Operations Management (IEOM), Australia (Accepted Nov 2025).
- *Latency-Resilient Cooperative Driving Framework for Vehicle Platooning in Urban Transportation*. AEU – International Journal of Electronics and Communications (Planned submission Dec 2025).

Professional Experience

Olo Inc., Full Stack Web Engineer *Jul 2025 – Present*

- AI start-up from the University of Tokyo, Matsuo Lab.
- Building and maintaining AI solutions for factory work efficiency.

WonderPalette Inc., Full Stack & Infrastructure Engineer *Nov 2024 – Jul 2025*

- Developed AI demand forecasting and cloud data pipelines.

Kyoshin Universal Campus, English Teacher *Jan 2022 – Mar 2024*

- Taught English communication to Japanese students while completing technical studies.

Skills

Programming: Python, Java, C, MATLAB, JavaScript, Go

Web Development: React, Vue, jQuery, Tailwind, Django

Cloud & DevOps: AWS, GCP, Docker, Kubernetes

Languages: English (Fluent), Japanese (Fluent), Persian (Native), Azerbaijani (Fluent)

Certifications & Awards

- Amazon Web Services (AWS) Certified Solutions Architect – Associate (Nov 2024)
- Takayama International Education Foundation Scholarship (Apr 2024)
- MEXT (Japanese Government) Scholarship (Apr 2021)
